FEATURES

- Suitable for High Speed printing
- Designed for Roll-to-Roll Applications
- Developed for LED and Mercury Vapour UV Lamps
- Good Gloss Levels
- Excellent Colour Gamut
- Supported by NUtec Digital's Ink Delivery System Warranty

OVERVIEW

Amethyst A50-RTR-MX is a fast curing, flexible UV ink suitable for LED as well as Mercury Vapour UV lamps and designed for self-adhesive as well as flexible medias.

The A-50RTR-MX performs well in a demanding, high speed printing environment and is ideal for printers producing high volume billboard-type applications.

The ink is NVC free ensuring the product is compliant with future regulatory requirements.

This formula is designed for compatibility across a broad range of print head models and features a superior colour gamut for bright, vivid images.

Provided the inks are used in regular applications, using suitable substrates, the printed images will last for up to 24 months.

PRINT HEAD COMPATIBILITY	Spectra Nova JA 80/256
